ABSTRACT

The English-to-Haitian Creole (HC) dictionary contains simple, direct translations of English words to HC using line drawings. Words are organized by theme: plants; food and drinks; animals; people; ethnicity; clothes; body parts; first aid; buildings; inside the house; hygiene; sport, hobbies, and games; musical instruments; tools; measuring tools; office and school supplies; school objects; symbols and numbers; horoscope signs; outdoors; antonyms; and transportation and communications. The introduction is in both English and HC, and both English and HC indexes are provided. (MSE)

INTRODUCTION

When we started this dictionary two years ago, we wanted to provide a readily accessible pictorial resource for communication. In the first edition, that was exactly what we provided. The unexpected number of requests we had from both Haitian-Creole and English users/speakers was an impetus to the development of a second edition of the Pictorial English/Haitian-Creole Dictionary. In this second edition, we progress from a 86 pages booklet velo-bound to about 300 pages perfect bound reference book with more than 5000 entries.

This book links words from English and Haitian-Creole to illustrations. It provides the users essential vocabulary to communicate effectively in a wide range situations. The drawings were chosen to illustrate everyday activities, physical environment, plants, animals, communication, transport, health, school, etc. The illustrations serve as a bridge in this dictionary, enabling the user, at a glance, to deduce the meaning of the term in both languages.

The information can be accessed thematically, using the table of contents that is organized sequentially or alphabetically, using the indices at the end of the book.

Most of the feedback we received from the previous edition came from students and their teachers, so tend to address their interests and concerns, in the organization of the book. However, the book can be used for education and communication or simply to enjoy its illustrations.

The Pictorial English/Haitian-Creole Dictionary is part in a wide collection of materials for instruction at all level.

We admire the pioneers who contributed a great amount of work in the development and promotion of the Haitian-Creole language: Jeanine Anas, Yves and Paul Dejean, Bryant Freeman, Robert A Hall, Edner Jeanty, Ormonde McConnell, George Mathelier, Ernst Mirville, Felix Morisseau-Leroy, William Smart, Albert Valdman and many more.

To prepare this Pictorial Dictionary, we consulted with writers, linguists, readers, creolists, teachers, students, preachers, etc. We wish to express our indebtedness in particular to Michel-Ange Hyppolite (Kaptenn Koukouy) of Sosyete Koukouy, Quebec, Canada; Andrea Posopokis of McGill University, Montreal, Canada; Anthony K. Lewis, Livie Allman, Henock Pierre-Louis, Gilbert Hyppolite, Nanette Barkey and Bienheuse Joseph-Simon.

The typing was done by Patricia Fethière, Josette Laborde, Felicia Williams and Livie Allman, using Word Perfect word processor from Word Perfect Corporation. The illustrations are done by Karen Simon, Jocelyne Plas, Raida Pita and Georges Gauthier. The cover design by Elizabeth Preuss. using Corel Draw from Corel Graphics and PowerPoint from Microsoft Corp.

ENTWODIKSYON

Dezan gentan pase depi nou kòmanse devlope yon diksyonè kreyòl ak desen. Lè nou te kòmanse, nou te vle ekri yon liv pou pèmèt moun ki pale Angle ak Kreyòl pale youn ak lòt sitou si youn pa konn pale lang lòt la.

Nou te ekri premye liv la ; men lè anpil moun kòmanse rele nan telefòn pou fè konpliman pou liv la, nou deside pibliye yon pi gwo liv. Liv sa a, se li ki nan men ou la a. Li gen plis desen, plis enfòmasyon, plis mo sou diferan kalite sijè ke premye edisyon an. Premye a te gen 86 paj, liv sa a gen prèske twasan paj avèk plis ke senk mil mo.

Liv la pèmèt moun kominike menm si li pa konn pale youn nan de lang yo. Li ka kominike menm si li pa pale ni Angle ni Kreyòl. Menm yon moun ki pa konn li ditou, si li ka rekonèt desen yo, li kapab kominike.

Nou chwazi desen ki montre aktivite moun fè toulejou, travay latè, plant , bèt, transpò, lasante, lekòl. Desen yo sèvi tankou yon pon pou ini lang yo.

Gen tout kalite moun ki sèvi ak liv sa a: pwofesè, elèv, avoka, doktè, pastè, travayè sosyal, moun ki kirye epitou moun tankou ou.

Si nou rive la se paske gen anpil moun ki te debleye teren an pou nou. Nou voye konpliman pou Janin Anas, Iv ak Pòl Dejan, Bryant Freeman, Robè Hal, Edme Janti, Omonn Makonèl, Jòj Matelye, Ens Mivil, Felis Moriso Lewa, Wilyam Smat, Albè Valmann ak anpil lòt ankò.

Pou nou prepare liv sa a nou kominike ak ekritè, lengwis, kreyolis, pwofesè, elèv, pastè ak lòt moun ankò.

Nou remèsye Kaptenn Koukouy, Mikèlanj Ipolit manm sosyete Koukouy Kanada, Andrea Posopokis manm inivèsite Magil nan Kanada; Antonni Lewis, Livi Olmann, Enòk Pyè Lwi, Jilbè Ipolit, Nanèt Baki, Byennèz Jozèf Simon.

Moun ki tape liv sa a se:
Patrisia Fetyè, Jozèt Labòd, Felisya Wilyams, Livi Olmann .

Moun ki fè desen yo se:
Karen Simon, Joslen Plas, Rayda Pita, Jòj Gotye. Desen kouvèti a se Elizabeth Preuss ki fè li.

Sistèm kò nou

Pou nou ka obsève epitou konprann kouman kò nou fonksyone, nou divize chak pati kò yo dapre fonksyon yo genyen.
Se konsa nou pale de sistèm.
An nou revize diferan sistèm ki genyen nan kò nou.

Premye sistèm na p pale se **sistèm zo.** Gen moun ki rele l sistèm eskelèt; nou tou wè pou kisa.
Si nou vle konpare kò nou ak yon machin,
Sistèm zo a se ta chasi a. Atikilasyon yo ta angrenaj yo, epitou tandon yo ta transmisyon an. Nou gen 206 zo nan kò nou, men tout pa gen menm fòm ni tout pa gen menm gwosè.

Lòt sistèm nou genyen, se sistèm vyann kò nou , gen moun ki rele l **sistèm miskilè**. Mis yo transfere fòs bay manm yo, tankou yon levye. Se sa ki fè nou ka deplase osinon fè travay. Nou gen pliske 600 mis nan kò nou

Sistèm san an (sistèm sikilasyon) pote gaz la toupatou. Nan kò nou gaz la se oksijèn nan. Sistèm sikilatwa pèmèt kò nou elimine tou sa nou gen nan kò nou ki initil. Sistèm sikilatwa a gen yon ponp, se kè a, ki ponpe san an nan yon rezo tiyo ki divize an twa gwoup:
1, atè yo ki pote san ki gen oksijèn nan tout kote kò a bezwen
2, kapilè yo ki se yon seri ti tiyo piti piti ki pote san yo pi lwen toujou nan tout ti rakwen nan kò nou.
3, venn yo ki reprann san ki pa gen oksijèn ankò pou retounen al chaje yo ankò ak oksijèn nèf.

Sistèm respiratwa a limenm se li ki pote oksijèn pou san an ka rechaje . Li kòmanse ak twou nen yo, ale nan poumon yo.

Sistèm dijestif la brase epitou dijere tout sa nou manje. Sa nou bezwen yo, li kite yo antre andedan kò nou, andedan san nou pou ba nou fòs. Tout sa nou paka dijere osinon nou pa bezwen, li elimine yo lè nou al poupou. Sistèm dijestif la kòmanse nan bouch, pase nan lestomak, nan ti trip, nan gwo trip, ale nan twou dèyè.

Sistèm pipi a elimine dechè ki nan san nou. Sistèm sa a gen ladan l ren yo, tib ki pote pipi a nan blad pipi a epitou tib ki pran pipi a nan blad pipi a pou devèse l deyò. Si se yon fi, pipi a sòti nan yon ti twou ki pi wo antre vajen li. Si se yon gason, pipi a sòti nan pwent penis li.

Sistèm lenfatik la pwoteje nou kont tout kalite enfeksyon. Se nan sistèm sa a nou jwenn glann ki anfle lè nou gen lafyèv la.

Sistèm nè yo gen twa pati : sèvo a ki nan tèt nou, mwèl ki nan zo rèl do nou, epitou lòt koneksyon ki al tache nan tout rès kò a.

Sistèm andokrin kontwole trafik ant tout lòt sistèm yo. Li gen plizyè glann ladan l tankou pankreas, sirenal, grenn gason, ovè fi, timis, tiwoyd, ak lòt ankò.

Sistèm fè pitit, (Sistèm repwodiktif) se li ki pèmèt moun fè pitit . Pou fi ki genyen ovè, ovil, twonp, matris ak bouboun.
Pou gason, li genyen, grenn osinon testikil, jèm osinon espèmatozoyd, pijon.

Skeletal System Sistèm Eskelèt

The vital organs are protected by bones; the cranium' protects the brain, the sternum,rib and vertebrae protect the organs in the chest. The body weight is supported by the hips

Pati ki frajil nan kò moun jwenn pwoteksyon nan zo eskelèt yo. Zo tèt la pwoteje sèvo a. Kòf lestomak la pwoteje kè, poumon ak lòt ògàn ki andedan l. Zo ren an pote chay kò a.

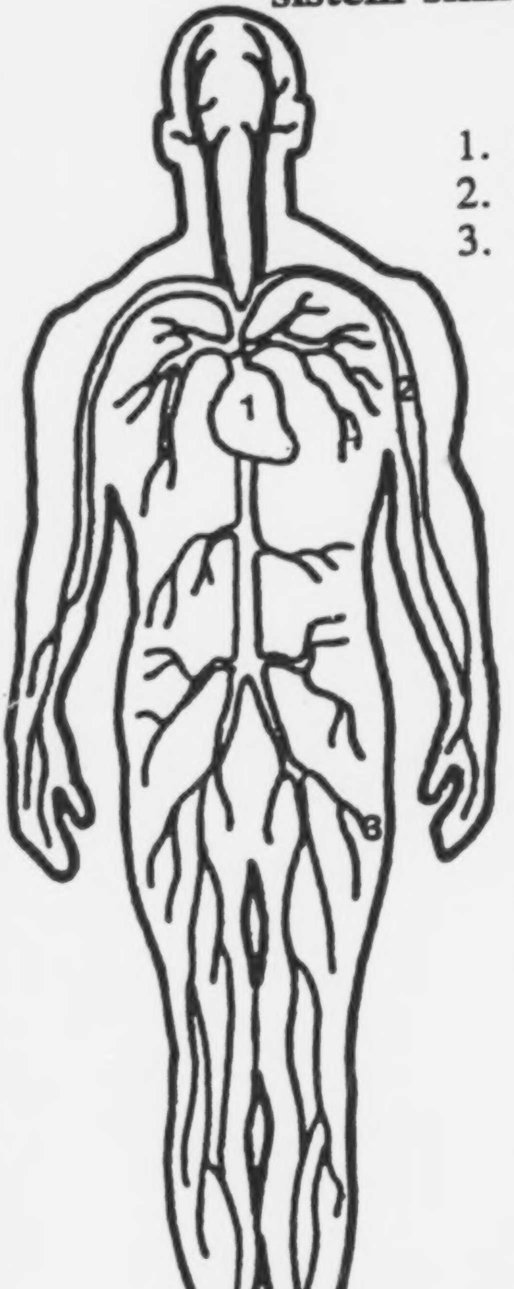
SKELETON / ESKELET

sistèm sikilatwa   circulatory system



1. heart: kè
2. artery and vein: atè ak venn
3. capillary: kapilè

Cells need food and oxygen. The arteries carry blood rich of oxygen and nutrients from the heart to cells in every part of the body. Veins carry the blood back for replenishment

Tout selil nan kò moun bezwen manje ak oksijèn. Atè yo sèvi kòm tiyo pou pote san ki fòtifye soti nan kè ale toupatou. Venn yo pran san yo pou retounen yo nan kè a ankò pou rechaje.

artery: venn san wouj
vein: venn san fonse
capillary: kapilè (ti venn piti, ti atè piti)

Lè yon moun blese, li koupe swa yon atè, swa yo venn oswa yon kapilè. Pou li ka geri, gen plizyè etap:

1. Kanal san an koupe
2. Kò a fè yon ti efò pou bouche kanal san ki koupe a
3. Kò a fè plis materyo pou bouche kanal la
4. Kanal la bouche, li fè yon kwout pou pwoteje kote ki blese a.
5. Reparasyon an kòmanse pa andedan.
6. Reparasyon an pi avanse
7. Wout kòmanse fèt pou san an pase nòmalman.

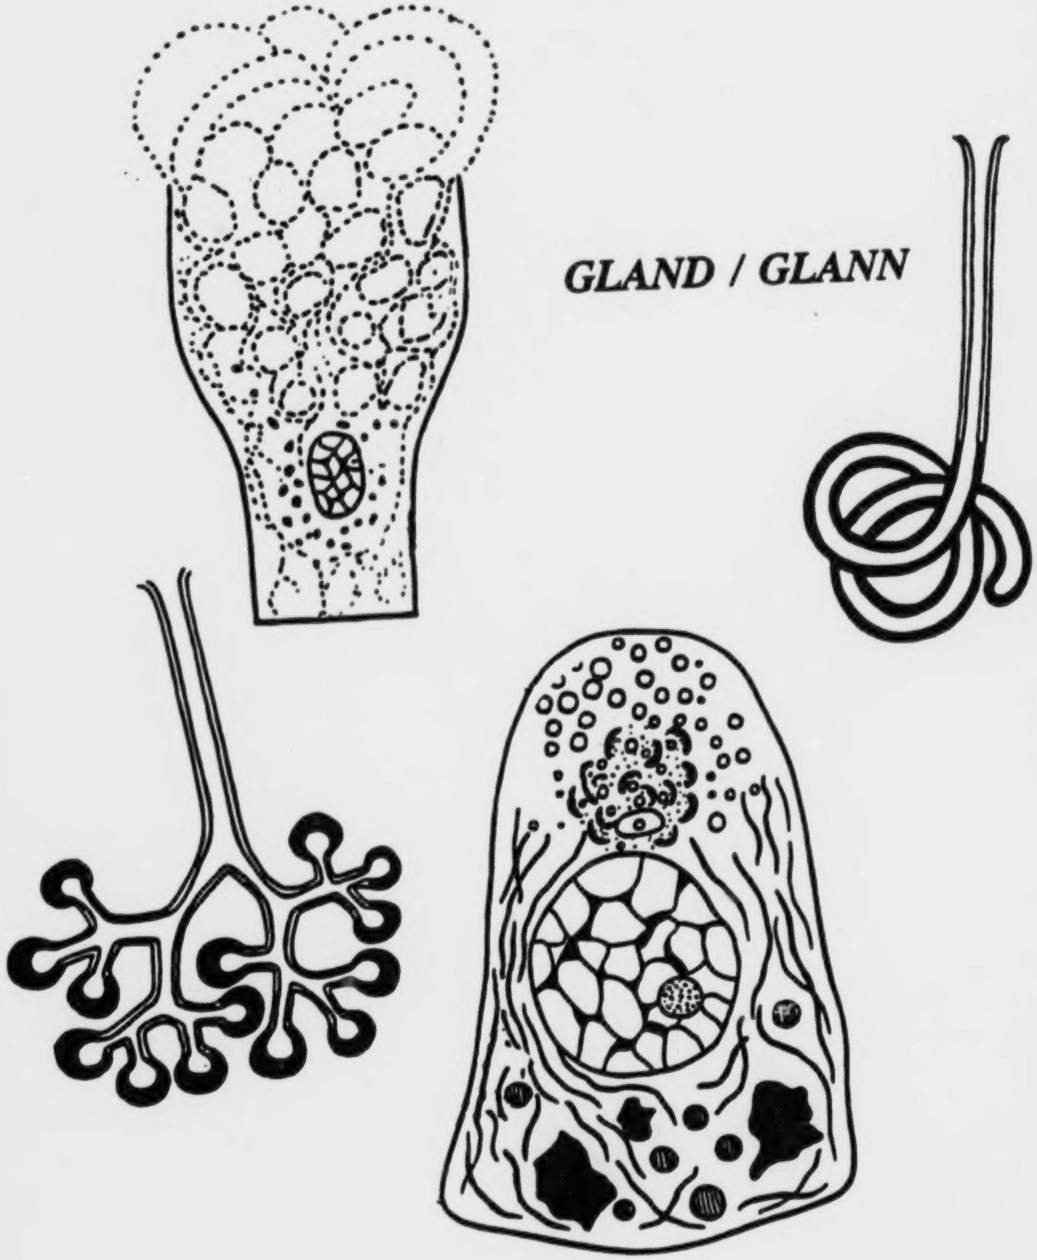
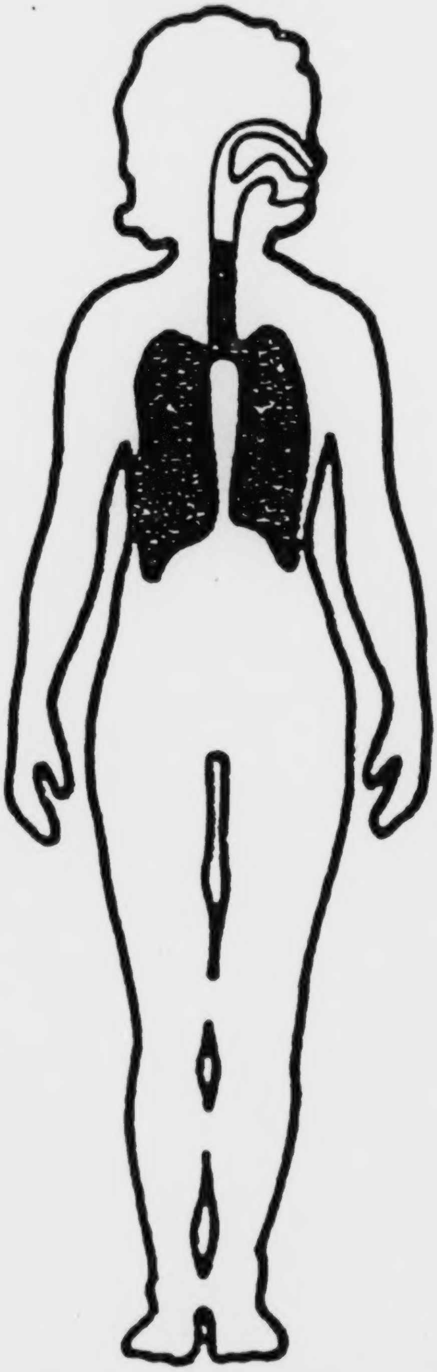
GLAND / GLANN



sistèm respiratwa respiratory system



Heart and lungs work together to provide nutrients and oxygen to every part of the body. The heart contracts day and night to pump blood everywhere.

Kè ak poumon travay ansanm pou voye monte san ki gen fòtifyan an toupatou. Kè a se yon ponp ki ap travay lajounen kou lannuit san rete pou ponpe san an.

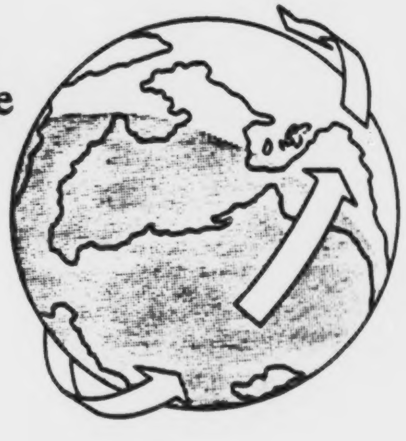
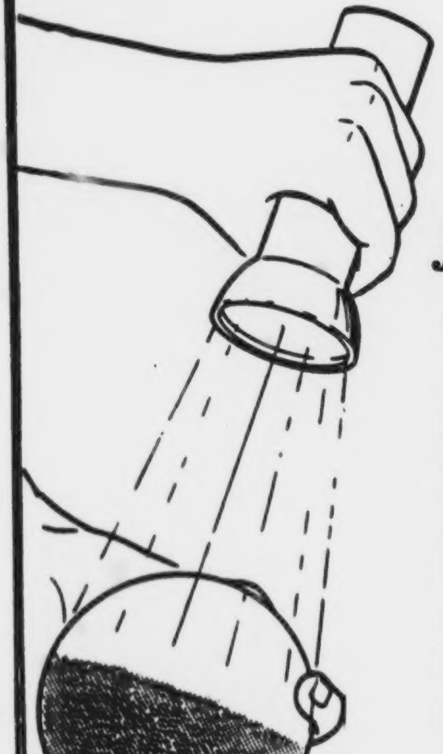
Day and night

the side of the earth when the sun shines is lighted, the other side is in dark. This is how we have day and night. The earth moves slowly and as it moves more of the dark area gets light and more of the previously lit area gets dark. You can test that by holding a ball in the dark and shine a flash light on one side of it.





Jou ak nannuit

bò kote latè a ki bay sou direksyon solèy la toujou klere, pandanstanan lòt bò a nan fè nwa.
Se konsa gen jou ak nuit. Latè a deplase tou dousman epi ofiamezi li ap deplase, zòn kote ki fè nwa a ap vin gen plis limyè pandan kote ki te gen limyè a ap vin fè nwa. Ou ka fè esperyans sa a si ou kenbe yon ti boul nan men ou nan fè nwa epi ou klere yon bò boul la ak yon flash.
